

"God is light upon light upon light ad Infinitum." Doctor Rouzie <http://aaronn.me>.

An activity involving mental or physical effort done in order to achieve a purpose or result is called work. Anybody who works during daylight hours finds oneself, for as long as one does not lie, cheat, or kill.

No lying means word is same as action, what one says is what one does.

No cheating means if for example, one is in a relationship, one must first breakup before forming a new relationship; in business relationship one must not emotionally or financially betray a business partner; while taking an exam one must not cheat by copying answers.

No killing means one must not take self or others life. Killing is permitted only in self defense.

If one finds oneself, then one has come to light.

Kabul, for hundreds of thousands of years, values life. Every living being has a name, what one says and does is inheritance one leaves for the next generation. Life of purest form, who do not believe in created worlds, get to live on earth.

*"God's will be done on earth as in heaven."* Says Aa dictionary.
